SERVICE BRIEF

Manufacturing IT

IT Solutions for Manufacturing Companies.

The Modern Manufacturer Has To Keep Their Finger On The Pulse Of New Technology

Technology is now at the heart of most businesses, but for manufacturers it often takes on a special role.

Technology touches nearly every part of a manufacturing process, and with the right solutions, any manufacturer can significantly accelerate productivity, streamline production, and see the type of uptime and efficiency your organization needs to get your business where you want to go.

At DatCom, LLC, we understand what technology solutions can mean to a growing manufacturer. We also understand that the deployment and management of that technology can be tricky with so many moving parts. This is why our technicians take pride in our vast knowledge base that can present a growing manufacturer the tools they are looking for to manage and protect their investments.

Powerful Technology To Drive Productivity

Successful manufacturers rely a great deal on timing.

When the success of your business relies on precision, you need technology solutions that meet your precise demands. At DatCom, LLC, we have the knowledge and experience to deliver precise technology solutions with customizable options that include the setup, management, and maintenance of comprehensive computing solutions.

- *On-site or cloud-based computing infrastructures* - Our technicians can design and build the computing infrastructure your business needs to stay efficient and productive.

- *End-to-end networking* - DatCom, LLC's specialists allow you to take full advantage of today's most dynamic wired and wireless technologies.

- *Software solutions to meet every demand of your business* - Manufacturers can really benefit from today's most sophisticated Enterprise Resource Planning software that allows for top-to-bottom cooperation and collaboration.

- *Complete monitoring and management of network and infrastructure* - DatCom, LLC delivers complete IT support including monitoring, management, and proactive maintenance on your entire network and computing infrastructure.

- *Thorough consulting* - Our consultants understand the best way to deploy your IT and provide a knowledge base that is a valuable asset in the design, implementation, and support of any new technology strategy, including a detailed understanding of business continuity and data protection.
